

## Med-Interpret/ Med-A-Word

- Med-a-Word feature enhances comprehension of medical terminology appearing in medical chronologies or deposition transcripts.
- For complex medical terminologies we have provided definitions and links for your reference in the medical chronology. The linked words will appear blue in color. Place the cursor on the blue words to refer the definition. Snapshot provided below to aid in reference.
- Definition pop-ups of medical summary or deposition terms appear by mousing over the desired term
- 5% additional charge to underlying bill

Patient Name		DOB: DD/MM/YYYY	
DATE	FACILITY/ PROVIDER	MEDICAL EVENTS	PDF REF
01/10/YYYY	Hospital/ Provider Name	<p><b>Operative report:</b></p> <p><b>Pre and postoperative diagnosis:</b> C6-7 HNP with radiculopathy.</p> <p><b>Operation:</b></p> <ul style="list-style-type: none"> <li>• C6-7 anterior <a href="#">discectomy</a> and fusion.</li> <li>• C6-7 <a href="#">anterior instrumentation</a>.</li> <li>• Placement of peek (polyetheretherketone) <a href="#">interbody cage</a> at C6-7.</li> <li>• Placement of nonstructural allograft bone graft with a peek interbody cage at C6-7</li> </ul> <p><b>Anesthesia:</b> General anesthesia.</p> <p><b>Notes:</b> This surgery was performed at Omega Hospital.</p> <p>Implants used for the case were <a href="#">Alphatec</a> Pegasus plate size 14 x 16 x 6 mm with a short anchors system. Bone graft was Cell Right Matrix OI.</p> <p>Intraoperative neural monitoring was used throughout the case including EMGs, SSEPs, and motor evoked potentials. All was stable throughout the surgery.</p>	150-153
