i) Sorted by date

Medical bills are sorted in chronological order and expenses are recorded in a separate spread sheet which includes the details like date of treatment, types of treatment rendered and expenses

incurred. Expenses that are related and not related to the injury are identified and captured in the sheet.

ii) Sorted by provider

Medical bills/expenses are sorted based on health care providers. This report extracts the patient's expenses for all the services rendered to them by every health care provider. This serves as a reliable document for attorneys to identify individual and total expenses incurred by the patient due to injury.
